### 18w vs 20w for iPhone 12 Fast Charging

Is there a substantial difference ?? On Apple's website it says that fast charging is only available on iPhone 12 with the 20w charger but people are saying that they can get similar results

### Do we have to have 20W or is 18W charger ok?

In the specs of the iPhone 12, it says "fast charge to 50% with a 20W or higher" yet says "..an 18W or higher" for the 11. So I also know the MagSafe charger states 20W as well but will this

>> Wed 12/04/19 8:15 pm Hi, I've just put an order in for a Mojotone 18w TMB after much deliberating between a 50w, figured for my use a

**What was Marshall's intent w/18w?**

But Joe, according to the Marshall literature, the 18W is "distortion free!" I still contend that the 18W was an attempt to gain some low end market share. I think they realised fairly quickly

**18w vs. 20w**

Yes, the 18W Lite IIb is just a one-channel version of the classic 18W. You can make a Lite IIb with either a vacuum rectifier or solid state. It doesn't have the strange 20W PI or some of the
