The origin on why '%20' is used as a space in URLs

I am interested in knowing why '%20' is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.

When should space be encoded to plus (+) or %20?

A html space is showing as %2520 instead of %20

312 A bit of explaining as to what that %2520 is : The common space character is encoded as %20 as you noted yourself. The % character is encoded as %25. The way you get

Solved: GUID (20 Characters) , Experts Exchange

GUID (20 Characters) Hello, i need GUID's for creating PID's for Groups in MS Access as vb6-code. The PID's should have a length of 20 characters. The characters should be a subset of
