5G FAQs

5G stands for the fifth generation of mobile communications. This next generation of technology promises consumers faster data rates with lower latency, or delays, in transmitting data.

5G System Overview

Schematically, the 5G system uses the same elements as the previous generations: a User Equipment (UE), itself composed of a Mobile Station and a USIM, the Radio Access Network

What is a 5G Base Station?

5G base stations operate by using multiple input and multiple output (MIMO) antennas to send

and receive more data simultaneously compared to
