

China's solar power generation cases

Overview

More than 720 GW of solar capacity are in development: about 250 GW under construction, nearly 300 GW in pre-construction phases, and 177 GW of announced projects, according to the Global Solar Power Tracker compiled by Global Energy Monitor. Over the past few years, China's solar industry has entered a period of intense upheaval. Price wars and margin compression have forced industry leaders-including Jinko Solar, Trina Solar, and JA Solar-to report significant losses. These firms, along with LONGi Green Energy and Tongwei-the. China is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatts (one terawatt, 1 TW) in May 2025. China has more utility-scale solar than any other country.

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentives

Photovoltaic research in China began in 1958

with the development of China's first piece of monocrystalline silicon. Research continued with the development of solar cells for space satellites in 1968. The Institute of Semiconductors of the Chinese Academy of Sciences led this research for a year, stopping after batteries failed to operate. Other research institutions continued the development and research of sola
