

China solar panel roof subsidies

Overview

China's Ministry of Finance (MOF) has increased its solar energy subsidies tenfold, from 100 million yuan to 1 billion yuan (US\$137 million) for 2024. The production of solar panels was the most subsidised industrial sector over the period 2005-24, which saw the People's Republic of China becoming dominant across the entire solar value chain. The scale of subsidisation in China's solar sector has contributed to continued investment in production. China has officially begun withdrawing its subsidies to solar panel exporters, signaling a significant shift in global solar economics. The findings highlight that green industrial policies pursued at the national level can become a powerful means of slowing global warming. Environmental. In a significant policy shift, China's National Development and Reform Commission (NDRC) announced it will scale back subsidies for renewable energy projects after years of rapid expansion.
