

# Communication base station inverter grid-connected supply

## Overview

---

Solar panels generate electricity under sunlight, and through charge controllers and inverters, they supply power to the equipment of communication base stations, with batteries acting as energy storage units to ensure power supply during nights or overcast days. A is a network of handheld (cell phones) in which each phone communicates with the by through a local antenna at a cellular base station (cell site). The coverage area in which service is provided is divided into a mosaic of small geographical areas called "cells", each served by a separate low. A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter-all housed within a durable, weather-resistant shell. Our systems can be deployed quickly and easily transported to different locations as project needs change. Summary of communication methods of inverter. Our company Nanjing Oulu Electric Co.
