

# DSP chip for solar inverter

## ESS

## Overview

---

This article presents a novel controller design for a solar inverter based on a multi-processor architecture centered around a TMS320F28335 DSP and two ARM Cortex-M3 microcontrollers. We will delve into the hardware system design, detailed circuit analysis, software framework, and.

## DSP chip for solar inverter

---

### [Grid-Connected Solar Microinverter Reference Design](#)

Microchip's Grid-Connected Solar Microinverter Reference Design demonstrates the flexibility and power of SMPS dsPIC(R) Digital Signal Controllers in Grid

### **A DSP-Based Power Electronics Interface for**

A new grid-tied inverter technology is based on the use of a state-of-the-art Texas Instruments digital signal processor (DSP) controller and the inventor's proprietary software.
