

Dig or Die Solar Generator Features

Overview

This update is now live! Most interesting change is the hydroelectric generators: their power limit has been increased from 5kw to 50kw! If you can manage to get enough water pressure, you'll be able to produce much more electricity than before with one single generator. Another. To power machines you need to transfer power using conductors called Electric Wires from the power generators to electrical machines. Power is transferred instantly but each power grid can only transfer up to 250kw at any given time. Crash land on a hostile planet where you'll have to build the strongest defenses if you wish to live to escape from it. Build strong, and smart; else physics may flood or destroy your only hopes of survival. Am i supposed to make a dam so big it will take all night to empty it?

I read about using. Dig or Die is a side-scrolling open-world survival crafting video game developed and published by Gaddy Games. The console versions are published by BlitWorks Games.
