

Disc solar power generation device

Overview

The disc type solar thermal and gas hybrid power generation device is simple in structure and high in practicability and energy efficiency conversion rate, meanwhile fully utilizes abundant rural methane resources or combustible gases like natural gas and petroleum gas in cooperation.

[Disc type solar thermal and gas hybrid power generation device](#)

The disc type solar thermal and gas hybrid power generation device mainly consists of a solar tracking probe (1), a disc reflection mirror (2), a tower frame (3), a heating chamber (4), a Stirling generator

[Disc-type solar power generation system and power generation](#)

The power generation method is particularly applied to the improvement of the disc-type solar power generation system and the comprehensive utilization of energy.

Optical disc production solar power generation

We demonstrate through precise numerical simulations the possibility of flexible, thin-film solar cells, consisting of crystalline silicon, to achieve power conversion efficiency of

Disc type solar thermal power generation system

The invention discloses a disc type solar thermal power generation system, which comprises a downwards concave disc-shaped light gathering device, a support stringer and a nut, wherein
