

Energy Storage Product Showcase

12V 10AH

Overview

From racking to inverters, cable management to storage, the RE+ 2025 tradeshow floor in Las Vegas (Sept. 9-11) will be packed with companies rolling out new hardware, digital tools, and domestic manufacturing updates.

Energy Storage Product Showcase

Expo Overview , Energy Storage South

The New Product Showcase gives you a front-row seat to the latest advancements in batteries, energy storage systems, components, testing equipment, and EV technologies - all presented by the

[Energy](#) , [MIT News](#) , [Massachusetts Institute of Technology](#)

Massachusetts Clean Energy Center CEO MBA '12 Emily Reichert highlights the state government's unique approach to fostering and keeping clean energy innovation.

RE+ 2025: Product launches, showcases and news

With RE+ at Las Vegas this week, here are some announcements to have hit the Energy-Storage.news desk ahead of the event.

Making clean energy investments more successful

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and policies by governments and

Explained: Generative AI's environmental impact

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

[Leading U.S. Renewable Energy Shows in 2026 You Can't Miss](#)

Helping solar + storage professionals gain key insights, information, and connections needed for success. With a sustainable digital display located in the

[MIT Energy Initiative conference spotlights research](#)

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

[MIT engineers create an energy-storing supercapacitor from ancient](#)

MIT engineers created a carbon-cement supercapacitor that can store large amounts of energy. Made of just cement, water, and carbon black, the device could form the basis for

[New facility to accelerate materials solutions for fusion energy](#)

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron proton beam

[Next-generation geothermal energy: Promise, progress, and challenges](#)

Geothermal energy, a clean, continuous energy source accessible in many locations, has been slow to catch on. Nearly 2,000 years ago, the Romans made extensive use of geothermal

[A new approach could fractionate crude oil using much less energy](#)

[Study: Fusion energy could play a major role in the global response to](#)

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that - depending on its future cost and performance - fusion energy has the potential

[How artificial intelligence can help achieve a clean energy future](#)

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel
