Evelyn Wang: A new energy source at MIT

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and channel

[Energy , MIT News , Massachusetts Institute of Technology](#)

Massachusetts Clean Energy Center CEO MBA '12 Emily Reichert highlights the state government's unique approach to fostering and keeping clean energy innovation.

[New materials could boost the energy efficiency of microelectronics](#)

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing circuit, which

[Concrete "battery" developed at MIT now packs 10 times the power](#)

New concrete and carbon black supercapacitors with optimized electrolytes have 10 times the energy storage of previous designs and can be incorporated into a wide range of architectural

Using liquid air for grid-scale energy storage

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, according to a new

energy storage system airflow simulation case

In this paper, the heat dissipation behavior of the thermal management system of the container energy storage system is investigated based on the fluid dynamics simulation method.

[A new approach could fractionate crude oil using much less energy](#)

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil

[Design and flow Simulation of compressed Air Energy](#)

Based on Kushnir's study and some hypotheses, the mathematical model of compressed air energy storage in aquifer is established in this paper.

[Solar container energy storage system airflow optimization solution](#)

Overview Does airflow organization affect heat dissipation behavior of container energy storage system? In this paper, the heat dissipation behavior of the thermal management system of

[New facility to accelerate materials solutions for fusion energy](#)

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron proton beam

Explained: Generative AI's environmental impact

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

[Thermodynamic simulation of compressed air energy storage](#)

Different energy scenarios (autonomous and connected to the grid modes), geographical locations and building typologies were proposed and analyzed.

Liquid Air Energy Storage System

This example models a grid-scale energy storage system based on cryogenic liquid air.

[Simulation analysis and optimization of containerized energy storage](#)

In this paper, the airflow organization distribution of the containerized energy storage battery thermal management system is evaluated by considering the heat exhaust capacity,

[Numerical simulation of airflow distribution in battery pack cooling](#)

Although end-cell hotspots persisted in all cases, the single-channel fin-PCM-air system reduced the peak cell temperature to 40 °C, 7 °C below that achieved by conventional air cooling.

[How artificial intelligence can help achieve a clean energy future](#)

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel

[MIT Energy Initiative conference spotlights research](#)

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

[Energy Storage System Air Simulation Diagram: The Blueprint for](#)

Let's face it - designing an energy storage system air simulation diagram is like trying to predict how a dragon would sneeze. You need to account for heat waves, airflow patterns, and potential thermal

ENERGY STORAGE SYSTEM AIRFLOW SIMULATION REPORT

Since the consumption of fossil fuels results in serious emissions and global climate changes [1, 2], sustainable energy forms such as solar, wind, hydroelectric, biomass, and geothermal energy are
