

# Fully covered with photovoltaic panels

## Overview

---

Yes, most homeowners insurance policies do cover solar panels, but the extent of coverage depends on several key factors including how they're installed, whether you own or lease them, and your specific policy terms. Can you cover an entire roof with solar panels?

Find out more about solar panel roofs below. There are two reasons solar panel installers advise against covering an entire. Here you basically have to input the total roof size, and the calculator will tell you how many 100-watt, 300-watt, or 400-watt solar panels you can put on your roof (theoretical maximum). They are typically a rack mounted system found over existing roof materials.
