

# Georgia solar energy for the environment

## Overview

---

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort. Community solar is the next big piece of the puzzle that. Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity\*, generate significant carbon-free energy for Georgians during sunny, daylight hours. Atlanta and Athens (as well as Savannah, Clarkston, and Augusta who have not finalized their plans yet) have. Shifting from fossil fuels to clean renewable energy is vital to achieving the low-carbon future we need to combat climate change. Combined with technological advances that. Georgia BRIGHT's Solar for All program is designed to meet every Georgian where they are, offering a range of solutions to bring the benefits of solar energy to households that have historically been left out and face the highest energy cost burdens.
