

# High frequency inverter tda

## Overview

---

This reference design provides an overview on how to implement a bidirectional three-level, three-phase, SiC-based active front end (AFE) inverter and power factor correction (PFC) stage. The design uses switching frequency up to 90kHz and an LCL output filter to reduce the size of.

**HIGH Definition & Meaning**

high implies marked extension upward and is applied chiefly to things which rise from a base or foundation or are placed at a conspicuous height above a lower level.

**Voltage Source Inverter Reference Design (Rev. E)**

This reference design uses devices from the C2000 microcontroller (MCU) family to implement control of a voltage source inverter. An LC output filter is used to filter the switching component in this high
