

Household photovoltaic power generation system without energy storage

Overview

The short answer is yes: You can absolutely use solar panels without battery storage. In fact, the majority of residential solar installations in the U. are "grid-tied" systems without batteries (although solar + battery systems are becoming more and more common). This comprehensive guide delves into how home battery backup systems operate independently of solar power. Depending on your setup, it's entirely possible to power your home using a solar inverter without ever installing a battery bank. This introductory section.
