

How many days does it take to install solar photovoltaic panels

Overview

After your solar system is designed and all the permits are in place, your solar panel installation company will schedule a time to install your panels. The process usually takes one day for most residential systems. **How Long Does It Take To Install Solar Panels in California?**

On average, transitioning to solar energy in California takes about 2-3 months from consultation to activation. This may be a long time, but it is well worth it if you have good project communication and professional installation partners. For simpler residential systems, reviews should take 1-3 business days-though SolarAPP+ eligible projects might get the green light same day. But don't be surprised if they ask for more info.
