

# How many kilowatt-hours of electricity can a solar generator use

## Overview

---

Calculate the required solar generator size based on your energy consumption, battery capacity, and solar panel input. Enter your details below to get started. A solar generator gives you a quiet, clean way to keep the lights on-but how long can it really power your appliances?

In this guide, we'll show you exactly what to expect based on your home setup. We'll break it down simply: what affects runtime, how to calculate it, and what size system you may. Many homes consume between 20 to 40 kilowatt-hours (kWh) per day under normal conditions. However, in emergency conditions, users often prioritize essential circuits: refrigeration, communication devices, critical lighting, medical equipment, and perhaps a small heating or cooling device.
