

How many years can a photovoltaic power generation bracket be used

Overview

As for photovoltaic modules and aluminum alloy brackets, a large number of research data show that the normal service life of photovoltaic cells can be used for 20 years. Why Choose EK SOLAR for Your Bracket Solutions?

With 14 years in renewable energy infrastructure, EK SOLAR delivers: Contact our engineers today: WhatsApp: +86 138 1658 3346 Email: [email]. China's national standards specify that the designed service life of solar mounting structure is 25 years. Generally, PV modules experience gradual performance degradation over time. After 25 years of operation, their conversion efficiency typically remains around 80% of their original efficiency. In actual new photovoltaic power plant projects, photovoltaic brackets have the following characteristics: Photovoltaic brackets must be used for long-term use in special natural environments. As a result, always maintain a well-sealed roof. These solar panels may be fixed or changed, and solar tr. On the one hand, photovoltaic brackets need to be used in specific environments for a long time and have strong mechanical properties such as resistance to wind pressure, snow pressure, earthquake resistance, and corrosion resistance to ensure normal operation in various harsh environments such as.
