

How much does a complete solar power system cost

Overview

The average cost of solar panels ranges from \$2.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. Solar power costs have reached historic lows in 2025, making home solar more affordable than ever. Solar panel installations typically cost between \$13,962 and \$27,924 in 2026. This guide covers everything you need to know about solar costs, including average prices per watt, system size estimates, incentives, regional differences, and payback timelines. For Californians, there are several other programs that keep solar getting cheaper in 2025, but the distance between a simple setup and a fully independent system is still big: The numbers above represent full system packages, including hardware, permits, installation, and basic monitoring.
