

How much does a wind turbine blade cost per pound

Overview

The price to procure a wind turbine blade ranges widely based on length, material, and supplier capabilities. For a typical utility-scale blade, buyers should expect a per-blade price in the low-to-mid six figures, with total project costs reflecting multiple blades and related. But for operators, investors, and engineers, one critical question often arises: how much does a wind turbine blade cost?

The answer is not straightforward. Assumptions: region, blade length, material. Wind turbine blades represent a significant portion of a turbine's overall expense; their cost varies greatly depending on size and materials, typically ranging from \$200,000 to over \$400,000 per blade. Wind energy is rapidly becoming a critical component of global efforts to reduce carbon.

How much does a wind turbine blade cost per pound
