

# How to clean dust from photovoltaic panels in winter

## Overview

---

Cleaning your solar panels once or twice a year can boost their efficiency by up to 20%. Use a soft brush, mild soap, and a hose-never a pressure washer. For hard-to-reach panels or added safety, hire a. This guide will walk you through everything you need to know about dealing with snow on your solar panels, helping you make the best decision for your system and your safety. The Great Debate: To Clear or Not to Clear?

The first question most solar owners ask is whether it's even necessary to. Winter snow can cut solar production when it builds up on your array, but you don't always need to take action. Heavy, wet snow can cover the modules long enough to block sunlight and push output close to zero until the panels clear. Rain often removes light debris, but dust, pollen, bird droppings, or snow buildup can reduce output over time. Light can get through the panels when there's a light dusting of snow, and when the snow is heavier, the 45-degree angles of most equipment should facilitate the snow sliding right off.
