

How to connect solar inverters to network devices

Overview

On your phone or laptop, open WiFi settings and look for a network named after the inverter brand (e. "GoodWe_XXXXXX", "Fronius_XXX", "SMA_XXXXXX"). To configure your inverter communication: Log into mySolarEdge - contact your installer if you still need a Username/Password to access the Monitoring Platform. Simply put this module connected to an inverter with communication cable and install APP from Google Play or Apple stores, it can not only monitor the inverters' operation status, but also set up. To connect a solar inverter to Wi-Fi, you generally need to have a smartphone or computer available to configure the network settings for the inverter's built-in Wi-Fi access point. The exact process can vary depending on the inverter's make and model, but typically involves going into its network. With TechFine's intelligent solar inverters equipped with integrated WiFi modules for solar inverters , users can now monitor their system remotely via a smartphone or web portal.
