

How to not fully charge solar power

Overview

When your lithium battery isn't charging from your solar panel setup, it can be frustrating, especially if you're off-grid or camping. The problem isn't your solar panels or batteries-it's how your installer designed the system in the first place. Your installer sized your solar array based on your total energy consumption but ignored how that. Solar batteries may not charge due to insufficient capacity or system faults. System faults can involve wiring problems or inverter failures. What am I missing?

What do I need to check with my meter and what to look for?

On a boat usually.

How to not fully charge solar power

Solar suddenly not charging to 100%

I do not charge my lithium battery bank high enough, so the SoC keeps dropping and was showing just 45% charged when I was over 80%. When I finally did charge it up past 95%, it jumped
