

How to place the photovoltaic panel tank

Overview

Proper panel positioning is crucial to maximize system efficiency and energy production. For optimal results in North America, solar panels should face true south (not magnetic south) and be installed at an angle between 30-45 degrees, depending on your geographical latitude. This diagram will serve as a blueprint for your project, helping you plan the placement of each panel and ensure an efficient and effective installation. From planning and permitting to interconnection and maintenance, we will walk you through every aspect of the installation process. Here's a simplified breakdown of how it works: 1.
