

Iraq Solar Power Generation Unit

Overview

com) - Iraq's largest solar energy project in the southern province of Basra has begun commercial production at its first unit, indicating a strategic shift toward clean energy and improving the country's electricity security. Iraq's Ministry of Electricity says an initial 61 MW from the first unit of a planned 1 GW solar project has commenced. The project is being developed across four 250 MW units, with final commissioning currently scheduled for 2028. China Energy Engineering Corporation, Baghdad (IraqiNews). The Baghdad government has stepped up the effort to adopt a more environmentally sustainable energy policy that includes. Pilot commissioning has begun for the first 61MW unit, which will be gradually ramped up to its full 250MW capacity. The first 250 MW section of a 1-GW solar plant in Iraq is expected to enter operation in the coming days after the facility's transmission network was energised for the first time.
