

Is it safe to charge with an outdoor power source in the UK

Overview

Installing an EV Charger outdoors in the UK can absolutely be safe - and in many cases ideal - as long as you treat it with the same rigour as any major electrical installation. Rainy weather is a regular occurrence in the UK, so electric cars and chargers are made to withstand all normal weather conditions including rain. There are several issues to consider. This blog explores them. First things first. You'll need a special cable (sometimes called a 'granny cable'). Let's break down what the regulations say and what you need to know to keep your outdoor power supply safe, legal, and flood-resistant.
