

# Is it safe to install photovoltaic panels on the X-Trail

## Overview

---

Putting in solar panels can be risky, so you need to follow safety steps to avoid accidents. Always wear the right safety gear, make sure your tools are in good shape, and check all connections carefully. One of our lockdown projects in 2020 was to install a solar battery system and drawer fridge into the back of our Nissan X-Trail. The mission is to have a fridge that's ready to fire up whenever we have a camping trip, can last about a week, and then slowly recharges itself whenever we're parked in. Is it safe to install photovoltaic panels on the is typically located at the bottom of your trail camera. These will be used as a back up in the event that th solar panel is not able to produce en more notable brand specific solar. These benefits are clear, but they also set the stage for looking at safety and legal requirements before installing panels. In addition, when paired with the Tactacam V2 Lithium Cartridge the Tactacam Solar Panel will recharge the cameras V2 Lithium Cartridge. I'm getting ready to put it out on a property that is about an hours drive from my home plus a pretty good up hill hike, so frequent checks and battery replacement WON'T be ideal.
