Solar panel installations typically cost between \$13,962 and \$27,924 in 2026. The actual price tag depends on your home's energy needs, roof characteristics, local incentives and other factors, all of which we'll break down in this guide. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. These benchmarks help measure progress toward goals for reducing solar electricity costs. NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. 2 gigawatts direct current (GWdc) of capacity in 2025, a 14% decrease from 2024. The utility-scale sector shrank nearly 40% quarter-over-quarter in the fourth quarter. The size and complexity of the installation, equipment quality, and specific business requirements all play a role in determining the overall cost.
