

Italy s new energy storage policy

Overview

With an inaugural auction slated for September, the scheme targets long-duration storage (up to 8 hours) and is initially focused on Southern Italy. The combination of competitive fixed payments and grid service access is expected to yield strong internal rates of return. The measure also raises regulatory and state aid concerns, potentially making the. With over 5 GW of BESS already installed and a government target of 50 GWh by 2030, the shift from small residential batteries to utility-scale infrastructure is underway. What's driving this acceleration?

Several factors: A favorable policy framework, including long-term incentive schemes and grid. As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible. In addition, electricity storage is critical. The Italian Ministry of Environment and Energy Security (" MASE ") shall define a mechanism for the development of new renewable energy capacity by energy-intensive companies through: (i) new photovoltaic plants, wind farms and hydroelectric plants with a minimum capacity of 200 kW each; or. Energy storage systems are a strategic asset to guarantee security and flexibility to the national electricity grid and accelerate Italy's energy transition.

Italy's new energy storage policy

POWER: Italy Sets 2025 Energy Priorities on Storage

Italy's Ministry of the Environment and Energy Security (MASE) has unveiled its 2025 energy priorities, focusing on streamlining regulations and expanding energy storage, it said, cited by PV Magazine.

Energy storage, how Italy secures renewables

"It is reasonable to expect that, when fully operational, all new renewable energy plants will already be installed with integrated storage systems. And where the market does not cover the
