

Kiribati Glass solar Power Generation Project

Overview

The EKLIPSE project aims to sustainably improve power supply and access in the Line Islands with a focus on renewable energy (solar PV and BESS integrated with existing diesel generators), efficiency and local capacity building. Kiribati faces three critical power issues: "Our communities need power systems that survive typhoons and salt spray," says a local project manager. "Cookie-cutter solutions just rust away within two years. " Recent projects show hybrid systems reduce diesel consumption by 40-60%. Here's how they. Kiritimati Island, the world's largest coral atoll and a key development hub for Kiribati with a rapidly growing population (currently roughly 8,000 people), has a dilapidated electricity micro-grid plagued by blackouts/brownouts and extending to only 40 percent of the island's population. Kiribati Green Energy Solution, a State-Owned Enterprise was established on 14 November 1984 under the Company Ordinance Cap 10A. E kamaeua te kawa n. Loading. It will do this by installing the innovative, climate-adapted and efficient floating PV (FPV) for power generation and. The Government of Kiribati has embarked on promoting the utilization of indigenous renewable energy for power and non-power applications through the 'Promoting Outer Island Development through the Integrated Energy Roadmap' (POIDIER) Project.
