

Large-scale electrochemical energy storage projects

Overview

The largest upcoming BESS projects in the world include BYD's 12.5 GWh project in Saudi Arabia, Greenergy's 11 GWh Oasis de Atacama project in Chile, and Sungrow's 7.7 GWh of storage was deployed in the first half of 2025, up 54% from last year, and the pipeline for the full year already exceeds 412 GWh. The largest. As the world races toward a sustainable energy future, electrochemical energy storage projects, particularly battery energy storage systems (BESS), are transforming how we manage and distribute power. These projects store excess energy from renewable sources, ensuring grid stability and supporting. Battery Energy Storage Systems (BESS), or electrochemical batteries, are currently the leading solution for storing electricity and are essential to the development of clean energy: the Enel Group is at the forefront of technological innovation in this sector too. The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to. From utility-scale installations to renewable integration solutions, explore how these projects address grid stability and decarbonization challenges. The industry has gone from strength to strength this year, with deployments continuing to break records and new markets opening up at scale all over.
