

Latest photovoltaic wind-resistant bracket installation specifications

Overview

nsiders the effects of wind loading on PV arrays including the mounting system. This technical note further highlights the consideration that should be made to ensure that a photovoltaic (PV) solar system is designed, tested and installed to resist the wind pressures that may be i. Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. The Protea Bracket fits most trapezoidal sheet profiles, including preassembled foam-core panels (IMPs - Insulated Metal Panels). Its stability directly affects the components' integrity, power output, and overall asset life. This can lead to weld or joint fractures, panel detachment.
