

# Latest version of photovoltaic panel supervision specification

## Overview

---

IEC 62548-1:2023 sets out design requirements for photovoltaic (PV) arrays including DC array wiring, electrical protection devices, switching and earthing provisions. ny guarantee of completeness or accuracy. The MCS Service Company Ltd and The MCS Charitable Foundation (and any related parties) do not accept liability for any errors or omissions in the document nor for the use or application of the information, standards or requirements con ard is freely.

Photovoltaic (PV): The technology of converting sunlight into direct current electricity with the use of semiconductor material. Photovoltaic Cell: An electronic device that converts the energy of light directly into electricity through the photovoltaic effect. A photovoltaic cell is also referred. Latest version of photovoltaic leveling 61215 and IEC 61730; or (ii) UL 1703; or (iii) equivalent. The temperature coefficient of power ( $P_{max}$ ) of PV panel shall not be more than 0. The solar PV system shall be of proprietary product. Financial Impact is Substantial: Properly commissioned solar systems deliver 2-8% higher energy production over their lifetime compared to inadequately tested systems, while improperly commissioned systems experience 2-3x higher failure rates in the first five years, potentially costing. Unless otherwise specified, no part of this publication may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm, without permission in writing from either IEC or IEC's member National Committee in the country of the requester.
