Others believe turbines consume more energy than they produce. The ProCon presents the pro and con arguments to debatable issues in a straightforward, nonpartisan, freely accessible way. Natural resources - materials from the Earth, found in nature, that can be used by humans for personal or economic gain, even their survival - include water, minerals, forests, and. Wind farms seek to offer an environmentally sustainable source of energy that will help reduce our dependence on non-renewable fossil fuels. However, this clean and safe source of energy is controversial with many opposed to its use, often on grounds of aesthetics or lack of efficiency and cost. The lawsuit states that the project already has been significantly damaged by GE Renewable's "inexcusably poor performance," and allowing the contractor to back out now would cause irreparable harm.
