

Marshall islands europe renewable energy

Overview

The Renewable Energy Generation and Access Increase (REGAIN) Project will increase the share of renewable energy (RE) generation, improve electricity service in targeted islands and strengthen the capacity (including gender inclusion) of key energy sector entities. The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way. RMI's residential utility rates are approximately \$0.35 per kilowatt-hour (kWh), more than twice the average U.S. Like many island nations, RMI is highly dependent on imported fossil fuels, leaving it vulnerable to price volatility. In a historic leap toward energy independence, the Republic of the Marshall Islands (RMI) has secured a game-changing grant equivalent to US\$60 million from the World Bank (WB), building on the momentum of its achievements of the WB-funded Sustainable Energy Development Project. The objective of the Sustainable Energy Development Project is to increase the share of renewable energy generation and enhance the reliability of electricity supply and improve energy efficiency in the Marshall Islands. Additionally, our islands are tiny, and renewable energy - solar.
