

# Myanmar household solar power generation

## Overview

---

Burma's (Myanmar's) electricity generation mainly depends on gas and hydropower, while renewable sources such as solar and wind contribute merely one percent to the overall output. However, residential solar systems have gained significant popularity and widespread. THE Shwe Myoh Solar Power Plant, located in Zeyathiri Township, Nay Pyi Taw Council Area, is expected to begin generating electricity in June 2026. 8 TWh/year, with an average of over 5 sun hours per day. Demand for energy has been growing fast, in parallel with the ASEAN (Association of Southeast Asian Nations) member's economy, and solar energy is competing against a variety of conventional, as well as alternative low- or zero-carbon, energy resources for it r's. Myanmar has abundant of renewable energy resources through the country. The government of Myanmar has set a plan to electrify the whole county in 2030. On the other hand, ASEAN has a target.
