

Nairobi Energy Storage Charging Station

Overview

Interactive map with real-time availability, connector types, and directions. Electric vehicles (EVs) are becoming more common in Nairobi, with over 9,000 registered by mid-2025. While Kenya's renewable energy resources and government incentives make EV ownership affordable, charging infrastructure remains a challenge with only about 20 public stations available. Our network is designed to offer reliability and efficiency, ensuring your EV is always ready for the road. This isn't just one type of charger popping up; it's a smart mix of slower AC chargers -perfect for home or office use-and the seriously powerful DC. The electropass is a universal access solution that allows you to charge your electric vehicle on a maximum of charging networks.
