

Namibia High Voltage Inverter

Overview

Designed for Namibia's extreme high-temperature environments, this solution utilizes next-generation low-loss magnetic materials and optimized winding structures to maximize lifecycle energy efficiency at 50°C ambient temperature. Hitachi Energy's leading high-voltage solutions will play a significant role in ensuring reliable power supply in Oshakati, Ongwediva, Ondangwa and surrounding areas. As a pioneering technology leader that is advancing a sustainable energy future for all, Hitachi Energy is delivering a. Have any questions?

Talk with us directly using LiveChat. To meet Namibia's rising. Two mayor types of inverter are available: Grid tied inverter interface to PV modules directly and generate AC electricity for grid feed in system, while the battery inverter requires a battery as the source of power. These are typically implemented in off-grid installation. Need more information. Our new Power Inverter / Solar Charger is one of the most advanced DC to AC inverters available today. The efficiency as well as the quality of the AC output is compatible with the world's leading companies.
