

Nigeria lands energy storage project

Overview

Nigerian utility company Kaduna Electric has announced plans for a 100 MW solar project with accompanying battery energy storage. The company signed a memorandum of understanding with Abuja-headquartered J-Marine Logistics Limited and its primary investor, ASI Engineering Limited. Nigeria's energy transition in 2025 is no longer being defined by incremental megawatts added to the national grid. Instead, it is being driven by a quieter but more consequential shift: the rise of decentralised, storage-backed power systems engineered for reliability, autonomy and economic. Image: A hybrid solar-hydro project is to be established at the Balanga Dam in Nigeria. Source: TheREANigeria/X Nigeria has emerged as Africa's second-largest importer of solar and storage products, with estimated annual project spending of about \$3 billion across sectors, according to the Solar &. President Bola Tinubu has disclosed that the Nigeria-Grid Battery Energy Storage System will benefit from a planned \$500 million facility from the African Development Bank (AfDB). Tinubu added that the system will provide electricity to 2 million Nigerians. The initiative aims to enhance electricity access for 2mn Nigerians as part of broader efforts to improve the country's energy. To help address this challenge, Namkoo is preparing to ship 13 integrated energy storage system cabinets to Nigeria, delivering a total project capacity of 1.
