

# Palau electricity distribution

## Overview

---

Palau Public Utilities Corporation (PPUC) is a government-owned utility that manages power generation and distribution in Palau. PPUC connects 98% of the households to a utility grid. As Palau is an island nation whose economic and social. This profile provides a snapshot of the energy landscape of Palau, an independent island nation geographically located in the Micronesia region. Palau's residential electricity rates are approximately \$0. dollars (USD) per kilowatt-hour (kWh), more than twice the average U. residential. The International Renewable Energy Agency (IRENA) is an intergovernmental organisation that supports countries in their transition to a sustainable energy future and serves as the principal platform for international co-operation, a centre of excellence, and a repository of policy, technology. In the energy domain, there are many different units thrown around - joules, exajoules, million tonnes of oil equivalents, barrel equivalents, British thermal units, terawatt-hours, to name a few. This can be confusing, and make comparisons difficult. With 100 MW of power generation and distribution capacity, the Armonia microgrid will enable Palau to meet its 45%-by-2025 renewable energy goal five years ahead of. Hence, COVID-19 has become a new risk to Palau's utilities sector, causing (i) a drastic decline in demand for electricity, water supply, and sewerage; and (ii) a widening gap in liquidity to sustain infrastructure.
