

Philippines bin energy independence

Outdoor Cabinet BESS
50 kWh/500 kWh Battery Storage System
Industrial and Commercial Energy Storage

- All In One**
Integrating battery packs
- High-capacity**
50 - 500kWh
- Degree of Protection**
IP54
- Operating Temperature Range**
-20~60°C (Derating above 50 °C)
- Intelligent Integration**
integrated photovoltaic storage cabinet
- Rated AC Power**
50-100kW
- Altitude**
3000m (>3000m derating)

Overview

The Department of Energy is fast-tracking the Philippines' shift to renewable energy as global oil prices surge, aiming for 35% clean power by 2030 and 50% by 2040, expanding electric vehicles and exploring ASEAN oil stockpiling to cut fuel import dependence and boost energy. The Department of Energy is fast-tracking the Philippines' shift to renewable energy as global oil prices surge, aiming for 35% clean power by 2030 and 50% by 2040, expanding electric vehicles and exploring ASEAN oil stockpiling to cut fuel import dependence and boost energy. The Philippines is actively pursuing a renewable energy (RE) transition to meet its NDC targets and the COP28 pledge to triple global RE capacity. Under the Philippine Energy Plan 2023-2050, the government aims to raise the RE share to 50 percent by 2050, supporting energy security and the balance. The Department of Energy is ramping up efforts to reduce the country's dependence on imported fuel and accelerate the shift to renewable energy amid rising global oil prices driven by tensions in the Middle East. Michael Sinocruz, director of the DOE's Energy Policy and Planning Bureau, said the. The country recently ranked second among emerging markets in BloombergNEF's Climatescope report, affirming its readiness as a serious investment destination for renewable energy. The investor confidence reflects the country's growing ambitions. It represents all the energy required to supply end users in the country.
