

Photovoltaic bracket electrophoresis

Overview

Based on the simplified bracket model, this article adopts the response surface method to lightweight design the main beam structure of the bracket, and analyzes and compares the bracket models before and after optimization. Therefore, this paper aims to investigate the application of bionics principles to propose a novel type of photovoltaic bracket pile foundation designed to meet diverse bearing capacity requirements, specifically suited for desert gravel areas: the photovoltaic bracket serpentine pile foundation. This paper focuses on the anti-corrosion technology of mountain photovoltaic brackets, and deeply explores the influence of natural factors such as mountain climate, sandstorms, and precipitation on the corrosion of photovoltaic brackets. Standards are norms or requirements that establish a basis for the common understanding and judgment of materials, pro hat is no less than 10% smaller than the estimates. After the contract award, the.
