## Overview

---

Solar energy for heating works by capturing sunlight through solar panels, converting it into heat, which is then used to warm air or water for residential or industrial use. Below, you can find resources and information on the. We use the sun's energy (solar thermal energy) for many things, including heating water, air, and the inside of buildings and generating electricity. When the sun shines through the windows of a building and. sun and use it to create usable energy. Solar water heaters are typically described according to the type of collector and the circulation system.
