confidence.

Solar explained

Concentrating Solar Thermal Power Plants
 Linear Concentrating Systems
 Solar Power Towers
 Solar Dish-Engines
 A solar power tower system uses a large field of flat, sun-tracking mirrors called heliostats to reflect and concentrate sunlight onto a receiver on the top of a tower. Sunlight can be concentrated as much as 1,500 times. Some power towers use water as the heat-transfer fluid. Advanced designs are experimenting with molten nitrate salt because of it See more on eia.gov
