

Production of photovoltaic bracket diagonal beams

Overview

Based on the simplified bracket model, this article adopts the response surface method to lightweight design the main beam structure of the bracket, and analyzes and compares the bracket models before and after optimization. Building attached photovoltaic (BAPV) products The BAPV solar products are added on rather than integrated in the roof or facade of building. The Uni-Solar laminate is flexible thin film PV modules, thus making it easy to incorporate with. The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels). Comprising a 3-in-1 Decoiler Straightener Feeder, a Stamping Press, and a Cold Roll Forming Machine, this line adopts a "Pre-Punching. Behind every solar panel lies a crucial component that ensures its stability and efficiency-the PV (Photovoltaic) mounting bracket. These brackets are the backbone of solar panel support systems, providing strength, durability, and adaptability across various installation scenarios.
