

# Slope and height changes of photovoltaic bracket

## Overview

---

This study investigated key factors affecting the stability of photovoltaic (PV) slopes using finite element models and an orthogonal experimental design. Slope height, slope gradient, and soil cohesion were evaluated based on safety factor (Fs) assessments.

## Slope and height changes of photovoltaic bracket

**How do you find the slope given  $y=3x-1$ ? + Example**

Explanation:  $y=3x-1$  is in the form known as "slope-intercept" form.

In buildings oriented with their ridges running east-west (i.e., north-facing slopes), it is essential to calculate the height difference between the front and back rows of PV
