

# Solar charging with a water pump inverter

## Overview

---

To convert an electric water pump to solar power, you'll need solar panels, a charge controller, a solar pump inverter, and optionally, batteries. The trick is sizing for surge (that brief "oomph" at startup), not just the running watts. We'll show you realistic numbers, the cleanest ways to power 12 V/DC and 120/240 V AC pumps, and the plumbing/electrical choices that make water flow when the sun. Converting your existing pump to solar is a smart, sustainable upgrade-without replacing your current pump. When you call into RPS we'll ask you a few questions first. 1) What is the HP of your AC water pump?

2) How old is your.
