

Solar energy for the environment solomon islands

Overview

The Solomon Islands Renewable Energy Development Project plans to finance new solar farms in Guadalcanal and Malaita provinces, along with a utility-scale grid-connected energy storage system in Honiara, the country's capital. The Asian Development Bank, Saudi Fund for Development, and Solomon Power are all financing the project. A project is now underway. As part of the SPIRES project, both institutions have partnered with the Ministry of Environment, Climate Change, Disaster Management and Meteorology (MECDM) for the installation of two solar hybrid power systems that were inaugurated on 6th and 7th October at Rokera Provincial Secondary School. However, a recent initiative by the Stimulating Progress towards Improved Rural Electrification in Solomon Islands (SPIRES) project has set a shining example of how renewable energy can revolutionize communities. With over 900 islands scattered across the Pacific, the Solomon Islands face unique energy access challenges. Solar PV systems have emerged as a. More than 1,200 people in the remote community of Takataka, East Are'are, are now benefitting from clean, reliable solar power through an Australia-supported partnership that is bringing off-grid renewable energy to one of the Solomon Islands' most isolated regions. Led by local company Superfly. The Takataka Eco-Village Conservation Foundation (TEVCF) has successfully handed over a state-of-the-art solar-powered hub and street lights to the community in East Are'are, Malaita province, in the Solomon Islands.
