

# Solar energy storage cabinet hybrid type for wastewater treatment plants in ireland

## Overview

---

Preconfigured solution that combines solar energy integrated with hot water storage. Lightweight all-in-one hybrid energy storage system with plug-and-play design enables quick installation and seamless grid integration, cutting deployment time and boosting productivity. Scope includes co-located plants that pair two or more generators and/or that pair generation with storage at a single point of interconnection, and also full hybrids that feature co-location and co-control. 'Virtual' hybrids are excluded, as are smaller (often behind-the-meter) plants not. Like energy, the need for clean water is increasing rapidly as supplies of traditional resources continue to diminish due to overuse, waste, and pollution. In the IEA SHC Task 62 on Solar Energy in Industrial Water & Wastewater Management more than 50 experts worked intensively together to identify. The GGS ECO-E107WS by Greeninnovations Global Solutions is a high-performance PV-plus-GBESS cabinet that integrates a lithium battery energy storage system (GBESS), hybrid inverter, HVAC, fire safety system (FSS), and battery control unit (BCU) into a single, modular, and scalable solution.
