

Solar glass can be directly placed outside

Overview

Yes, solar panels can work through windows. Outdoor solar shades are retractable fabric screens engineered for exterior use, providing an effective barrier against the sun's energy before it reaches the window glass or patio space. Unlike conventional solar panels, it permits visible light to pass through while harnessing ultraviolet (UV) and infrared (IR) light to produce. Indoor solar blinds are easier to install, more affordable, and better for aesthetics. The problem is that window glass, coatings, reflections, indoor. Architects often choose either solar glass or solar shading such as external blinds to comply with Building Regulations Part O introduced in 2023 to tackle overheating. Perfect for shading outdoor spaces, but versatile enough for indoors as well.
